

CARDIOVIT AT-102

The multifunctional genius
with an excellent
price/performance-ratio!

SCHILLER

CARDIOVIT AT-102 – has it all!

The most important Cardiorespiratory Function Tests are combined in one single device:

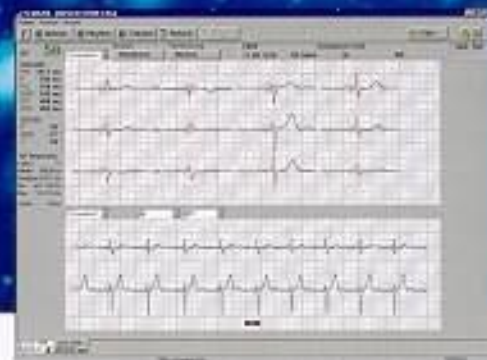

- Resting ECG
- Exercise ECG
- Spirometry

Performance:

- Intuitive, easy use with direct function keys
- 12-channel Resting ECG
- Measurements
- Interpretation (optional)
- Storage and serial data transfer for Resting ECG and Spirometry data on PC
- A4-formatted printouts on internal or external printer
- Basic Exercise test capability (optional)

Possibility of data transfer to SCHILLER Data Management System SEMA-200

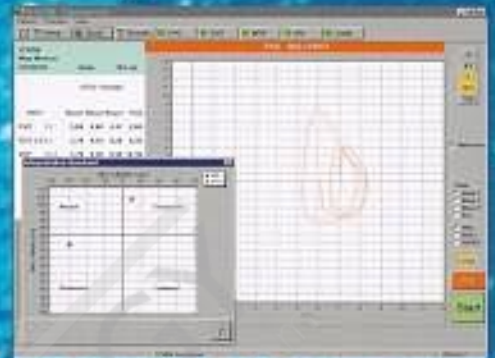

Resting ECG

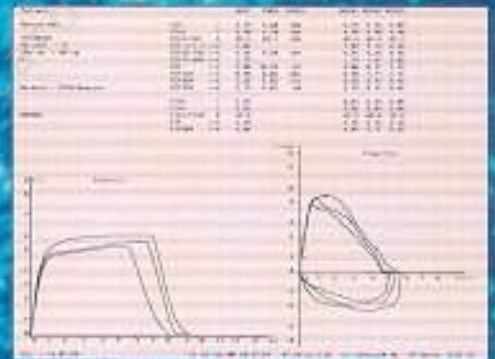

Operating Elements:

- Integrated 3-channel monitor
- Alphanumeric keyboard
- Direct function keys for the most important function tests
- Easy Print: Integrated high-resolution A4 thermal printer, subsequent printout on thermoreactive paper possible
- Interface for external printer for A4 printouts on regular paper

- Saving possibility for more than 40 records
- Interface for data-transmission

Spirometry view in the SCHILLER Data Management System SEMA-200

Spirometry

- Unique SP-250 with disposable sensor to reduce the risk of contamination
- SP-260 with reusable sensor
- Simple and fast calibration
- Saving possibility for more than 40 records
- All inspiratory and expiratory tests as well as pre and post medication tests
 - Selectable predicted value tables
 - Real-time curves and measurement information on the large screen
