PHYSICIAN OFFICE SUPPLIES

Equipping the medical professional since 1910

Your Practice Benefits with Medline

Lower costs.

As a manufacturer who sells direct, you benefit from our keen eye toward cost reduction at every point along our supply chain. Our business model isn't built solely on markups of other firm's products. Our service model saves your staff time and dollars, too. With Medline, your one rep can handle nearly all of your supply and capital equipment needs.

Simplified operations.

Of course, ordering is simple through your rep, online, or by phone, fax or EDI. But with Medline, you can reduce the number of distributors you deal with, without reducing the number of choices you have for your medical supplies. Medline acts as prime vendor for large IDNs; we know how to make high-service-level relationships like this work.

Enhanced revenue.

Are you sending patients to labs for quick diagnostic tests? You're sending revenue out the door with them. Are you sure your high-risk patients are getting a flu shot? You can be when you administer it yourself. Your Medline rep will work with your practice management to help uncover ways to increase revenues and enhance your delivery of care.

Satisfaction.

Patient satisfaction is central to the discussion of healthcare today. Having all the supplies and equipment you need to make your patient encounters timely, efficient and cost-effective is key to satisfaction. But we also care about your satisfaction. It's why we offer guaranteed savings programs, "order today, have it tomorrow" logistics and innovative products.

Get to know Medline

Medline provides quality medical products with exceptional value to healthcare providers and end users, improving patient care and enhancing the quality of peoples' lives.

Medline is a great American success story. A.L. Mills was sewing protective garments in his Chicago home when nuns from a hospital approached him to sew surgical gowns. A century later, the Mills family is at the helm of the largest privately held medical manufacturer and distributor in the U.S., with 2010 sales in excess of \$4 billion. And we still sew surgical gowns.

As a privately held firm, Medline can be exceptionally responsive to customer needs, with the flexibility to solve problems that few others can match. Our management team and each and every one of our 7,000 global associates stand ready to demonstrate that service commitment to you.

Jant Accustrip® URS Reader

No-Touch Operation

Strip analysis begins automatically when placed on instrument. No further input or action is needed.

Touch-Screen

Easy-to-use touch screen operation. All functions can easily be accessed with a touch of the screen. An optional external keyboard can be connected to allow convenient input of patient names.

Interface Options

The instrument includes both USB and RS232 interfaces. It can easily be connected to existing Laboratory Information Systems and also to PCs using Accustrip URS Result Control Software.

Small Footprint

Small footprint of only 8"D x 6"W x 3"H enhances portability of device. Combined with option for battery operation, this is the ideal instrument for near-patient testing.

Both Power Battery and External Power Options

110-240 volt or AC optional battery power source allows the instrument to be used wherever it is needed.

Memory for 200 Measurements

Up to 200 measurements can be restored in reader. Using internal software functions, positive readings can be filtered and easily identified, enabling further diagnosis and intervention, when necessary.

Integrated Diagnostic System by Medline

The Integrated Diagnostic System provides optimal flexibility for hospitals and medical practices.

The diagnostic station modules can be combined individually to suit the requirements and location. Thanks to its innovative design it is variably extendable to the right and the left.

The advantages of the system can be seen in its versatile combination of options.

- LED illumination for otoscopes and 3.5v xenon illumination for ophthalmological instruments supply daylight conditions
- The regulating switch enables optimal electronic efficiency
- Constant output voltage independent of the power supply prolongs the service life of the lamps and guarantees optimal light intensity
- The handles automatically switch on or off when removing or replacing them in the handle unit; this saves energy and increases the service life of the lamps, while the adjustable light intensity setting is maintained until the next examination
- Non-slip, ergonomically designed handles with rheostat: the handle enables continuously adjustable brightness as well as manual switching on and off
- Spiral cord stretches up to 3 meters
- Easy cleaning and disinfection of the instruments
- Instrument heads available with and without anti-theft device
- Developed and manufactured in Germany

SunTech® 247 Patient Monitor — An Expandable Diagnostic Station With BP, Temperature and SpO₂

This patient monitor was designed to measure clinical grade vital signs, while allowing the unit to be customized to the facility's needs. The 247 Patient Monitor is completely modular, meaning that you can purchase the functionalities you need today and then add additional parameters, if needed. In addition, it combines the efficiency of an automated monitor with the convenience of a manual mode that allows the clinician to take a BP reading with a stethoscope whenever needed!

anti-microbial / anti-viral surgical facemasks

HOW IT WORKS:

The BioMask™ has a hydrophilic plastic coating that rapidly absorbs aerosol droplets away from the outer surface of the mask. The first and second layers of the mask are treated with different compounds that inactivate influenza viruses.

- ✓ inactivates **99.99%** of pandemic **H1N1 influenza virus tested***
- ✓ safe, smart & simple
- ✓ comfortable face-design

*Inactivates **99.99%** of the following tested influenza viruses on 5 minutes contact with the surface of the facemask, as tested in laboratories

WOUND CARE

Medline started the Generation Pink® movement with a single vision:

A World Without Breast Cancer is in Our Hands®. It's now the largest philanthropic cause in our company, where we partner with the National Breast Cancer Foundation to support free mammograms for underserved women, build awareness at forums for nurses and other healthcare workers, and even spread awareness virally through social media and events such as The Pink Glove Dance™.

For each case (1,000 gloves) of Generation Pink gloves that you purchase, we will donate \$1 to the National Breast Cancer Foundation. Your overwhelming response to Medline's pink gloves helps make our support of awareness, early detection and prevention possible. Thank you.

Generation Pink Pearl—The Everything Glove

Pink Pearl starts with the extra protection of nitrile, adds the soothing comfort of an organic aloe coating, then gives the glove the glamorous sheen of your favorite string of pearls. Pink Pearl offers exceptional chemical resistance and barrier protection and the aloe vera coating soothes and softens hands. It's truly the glove for people who like having it all. Tested for use with chemotherapy drugs.

Woven Gauze Sponges

The best for traditional wound care

These 100% cotton sponges are ideal for wound dressings, wound packing and general wound care. Our strictly controlled manufacturing process assures clean, debris-free packing with folded edges to prevent unraveling. Sterile 2's are packed in coated paper envelopes to reduce fiber debris. This easy-open envelope is also carefully sealed to prevent the intrusion of dust and contaminants. Sterile 10's feature strong rigid trays. Also available in non-sterile bulk packs.

Avant Gauze® Non-Woven Sponges Rayon/Polyester Blend

Avant Gauze® is Medline's standard non-woven dressing. Compared to traditional cotton gauze, Avant Gauze® produces less lint and is less traumatic to fragile granulating wound tissue because it's virtually non-adherent. It also has significantly faster wicking ability which promotes a healthy healing environment. Discover the perfect balance between strength and absorbency in this rayon/polyester blend gauze.

Avant Gauze® Drain Sponges

Special fenestration for easy application

This sponge features a unique fenestration which allows it to lay flat when wrapped around a drainage tube. Without it, the sponge will pucker, decreasing effectiveness by allowing fluids to pool around the drain tube. It's a simple feature that most other drain sponges do not offer. Includes all the benefits of non-woven Avant Gauze®. Each 6-ply rayon/polyester sponge is highly absorbent, low-linting and fast wicking to wound beds.

Abdominal (ABD) Pads

Features extra absorbency and wicking

Medline's super absorbent abdominal pads feature a soft non-woven outer layer that quickly wicks fluid to a cellulose center. This thick layer of cellulose quickly absorbs and disperses fluids laterally to prevent pooling. Hydrophobic back impedes strike-through and all edges are sealed to prevent linting.

ABD/Combine Pads

For heavily draining wounds.

- Soft, non-woven rayon/polyester outer layer is virtually non-adherent
- Compressed cellulose center quickly absorbs heavy exudate
- Hydrophobic back retards strike through
- Sealed, finely finished edges prevent linting

Sof-Form® Conforming Bandages

Compare to Kendall Conform®*

This premier quality bandage gently secures to any body contour without restriction of movement and accommodates an increase or decrease in swelling. The uniquely constructed weave and finished edges help eliminate unraveling and lint. The combination of rayon and polyester help the bandage to provide stretch memory when applied. It's a patient-safe dressing that renders a neat application each time. Ideal for secondary dressing applications.

Bulkee II® Sterile Cotton Gauze Bandages

Ideal for both primary and secondary wound care dressings. When used as a primary dressing, the open weave design provides fast wicking, absorbency and aeration. Bulkee II has a more tightly finished edge for reduced linting; and more crimps per linear foot for increased cushioning and patient comfort. The 6-ply Bulkee II bandage stretches and conforms to a variety of patient needs. It performs exceptionally well in burn care applications.
