

élance™

Performance with Style

Your next vital signs monitor.....performance with style

Spacelabs Healthcare's *élance* Patient Monitoring family achieves the balance between performance, intuitiveness and mobility...with style.

With over 50 years of partnership with healthcare professionals, we understand...

- ...the importance of having clinical tools that fit harmoniously into your environment
- ...the need for vital signs parameters to enhance your workflow
- ...the benefit of combining functionality and elegance in a crowded clinical setting

élance Patient Monitoring brings together key clinical elements in a new streamlined form for informed decisions and the best patient care.

Maximizing Performance

élance provides a high-performance patient monitoring solution, delivering the essential parameters for any care environment.

With an *élance* Central Station, information from up to 32 patients comes together.

Optimizing Intuitiveness

élance monitors provide many ease-of-use improvements:

All *élance* monitors make it easier and more intuitive to view and access information by providing an ultra bright and vivid widescreen display. Spacelabs consistent use of touchscreen user interface further simplifies access to information and controls.

The use of Microsoft® Windows® CE technology in *élance* monitors enhances the ease in managing real-time measurements, graphics display, network communications and USB software upgrade.

The *élance* monitors are networked directly to a Windows XP-based Central. As a result the *élance* Central is easy to install, to maintain and to use.

élance Enhancing Mobility

élance is not just a bedside monitor, it is a patient-side monitor. *élance* monitors are ideal in any clinical environment, wherever patient care is needed.

The *élance* monitor provides incredible high performance, in a lightweight, slim form, with integrated handle and simple and safe mounting solutions.

The 5-hour lithium-ion internal battery and built-in power supply enhance the mobility of all *élance* monitors.
