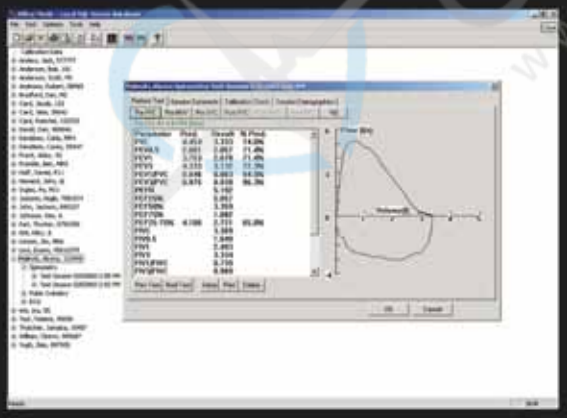
SpiroCard®

...the only PC Card spirometer in the world. SpiroCard brings full-function spirometry to off-the-shelf computers and handhelds.

A simple menu system walks you through FVC, SVC or MVV, including pre/post testing in just minutes. Interactive flow and volume incentives such as a balloon, ball, clown and others make testing fun. A variety of options let you customize report parameters, predicted normals and graphs.

- Pre-calibrated, disposable mouthpieces eliminate sterilization and calibration
- Meets or exceeds the ATS Standardization of Spirometry Guidelines (1994 Update)
- View and report only the test parameters you desire
- Automatic test quality messages and narrative interpretation



View real time graphs, tabular results, and predictors on-screen.

- *Validated by LDS Hospital Pulmonary Laboratory against 26 demanding waveform tests (99.4% accurate)*
- *Out performed systems costing 10 times the price*

Basic Specifications:
(visit QRS website for complete specifications)

Dimensions:	140mm x 53mm x 16mm
Weight:	57 grams (less than 2 ounces)
Calibration:	ATS 3-speed or Standard Calibration Check
Flow:	±14 liters per second
Volume:	0 to 8 liters BTPS

SpiroCard is the smallest, lightest and most accurate spirometer on the market.

Now you can perform full-function spirometry anywhere.
