

## Key Features

- Built-in anatomically correct curve for easy atraumatic insertion
- Cuff and airway tube molded as single unit for extra safety - no separation
- The surface has a microstructured texture to ease insertion
- A soft cuff ensures a good seal with low mucosal pressure
- Pilot balloon identifies mask size and provides precise tactile indication of degree of inflation
- Ergonomically shaped airway tube for firm grip during insertion
- Convenient depth marks for monitoring correct position
- Packaged sterile and ready for use
- Color-coded pouch with directions for use
- Disposable
- Latex free
- Removable airway connector for intubation through the laryngeal mask

## Ambu® AuraOnce

Ambu AuraOnce has a special curve that carefully replicates natural human anatomy. Molded directly into the tube, the unique shape makes correct insertion easy without abrading the upper airway.

AuraOnce's curve also ensures that the patient's head remains in a natural supine position when the mask is in use without extra stress on the upper jaw. Moreover, AuraOnce is specially designed to give the airway tube the flexibility needed to adapt to individual anatomical variances and a wide range of head positions. AuraOnce has a D-shaped airway tube to give a firm and ergonomic grip during insertion. In short, positioning is fast and accurate, with low internal pressure.

Available in 8 sizes fitting a wide range of patients.

### PRODUCT

Tube/Cuff	PVC
Airway connector	Polypropylene (PP)
Pilot balloon	PVC
Inflation valve body	PVC
Inflation valve plug	Polypropylene (PP)
Inflation valve stem	Silicone

### MATERIALS

### PACKAGING

Pouch	Tyvek®/Polyethylene Terephthalate (PET)/ Polyethylene (PE)
Box	Cardboard

### MATERIALS

## SPECIFICATIONS
